

Declaration of using generative AI tools (for students)

Declaration of using generative AI tools (for students)
☒ I/we have used generative AI as an aid/tool <i>(please tick)</i> ☐ I/we have <u>NOT</u> used generative AI as an aid/tool <i>(please tick)</i> <i>If generative AI is permitted in the exam, but you haven't used it in your exam paper, you just need to tick the box stating that you have not used GAI. You don't have to fill in the rest.</i>
List which GAI tools you have used and include the link to the platform (if possible): GitHub Copilot [https://github.com/features/copilot] Perplexity [https://www.perplexity.ai/]
Describe how generative AI has been used in the exam paper: 1) Purpose (what did you use the tool for?) 2) Work phase (when in the process did you use GAI?) 3) What did you do with the output? (including any editing of or continued work on the output) <i>I used GitHub Copilot for helping with coding. It was used for planning out the steps for my code and debugging to help resolve errors in my code. I also recieved some coding suggestions inline while typing. The suggested code was always reviewed and modfied. The debugging suggestions was used to understand the errors encountered and help solve them. Plerplexity was used during writing for the report to provide suggestions for spelling and grammar. It also helped with suggesting how to shorten the paragraphs. All suggestions were reviewed and edited.</i> <i>Please note:</i> Content generated by GAI that is used as a source in the paper requires correct use of quotation marks and source referencing. Read the guidelines from Copenhagen University Library at KUnet here.
